

A. Exponential decay kernels

B. Spatial weight fields at different scales

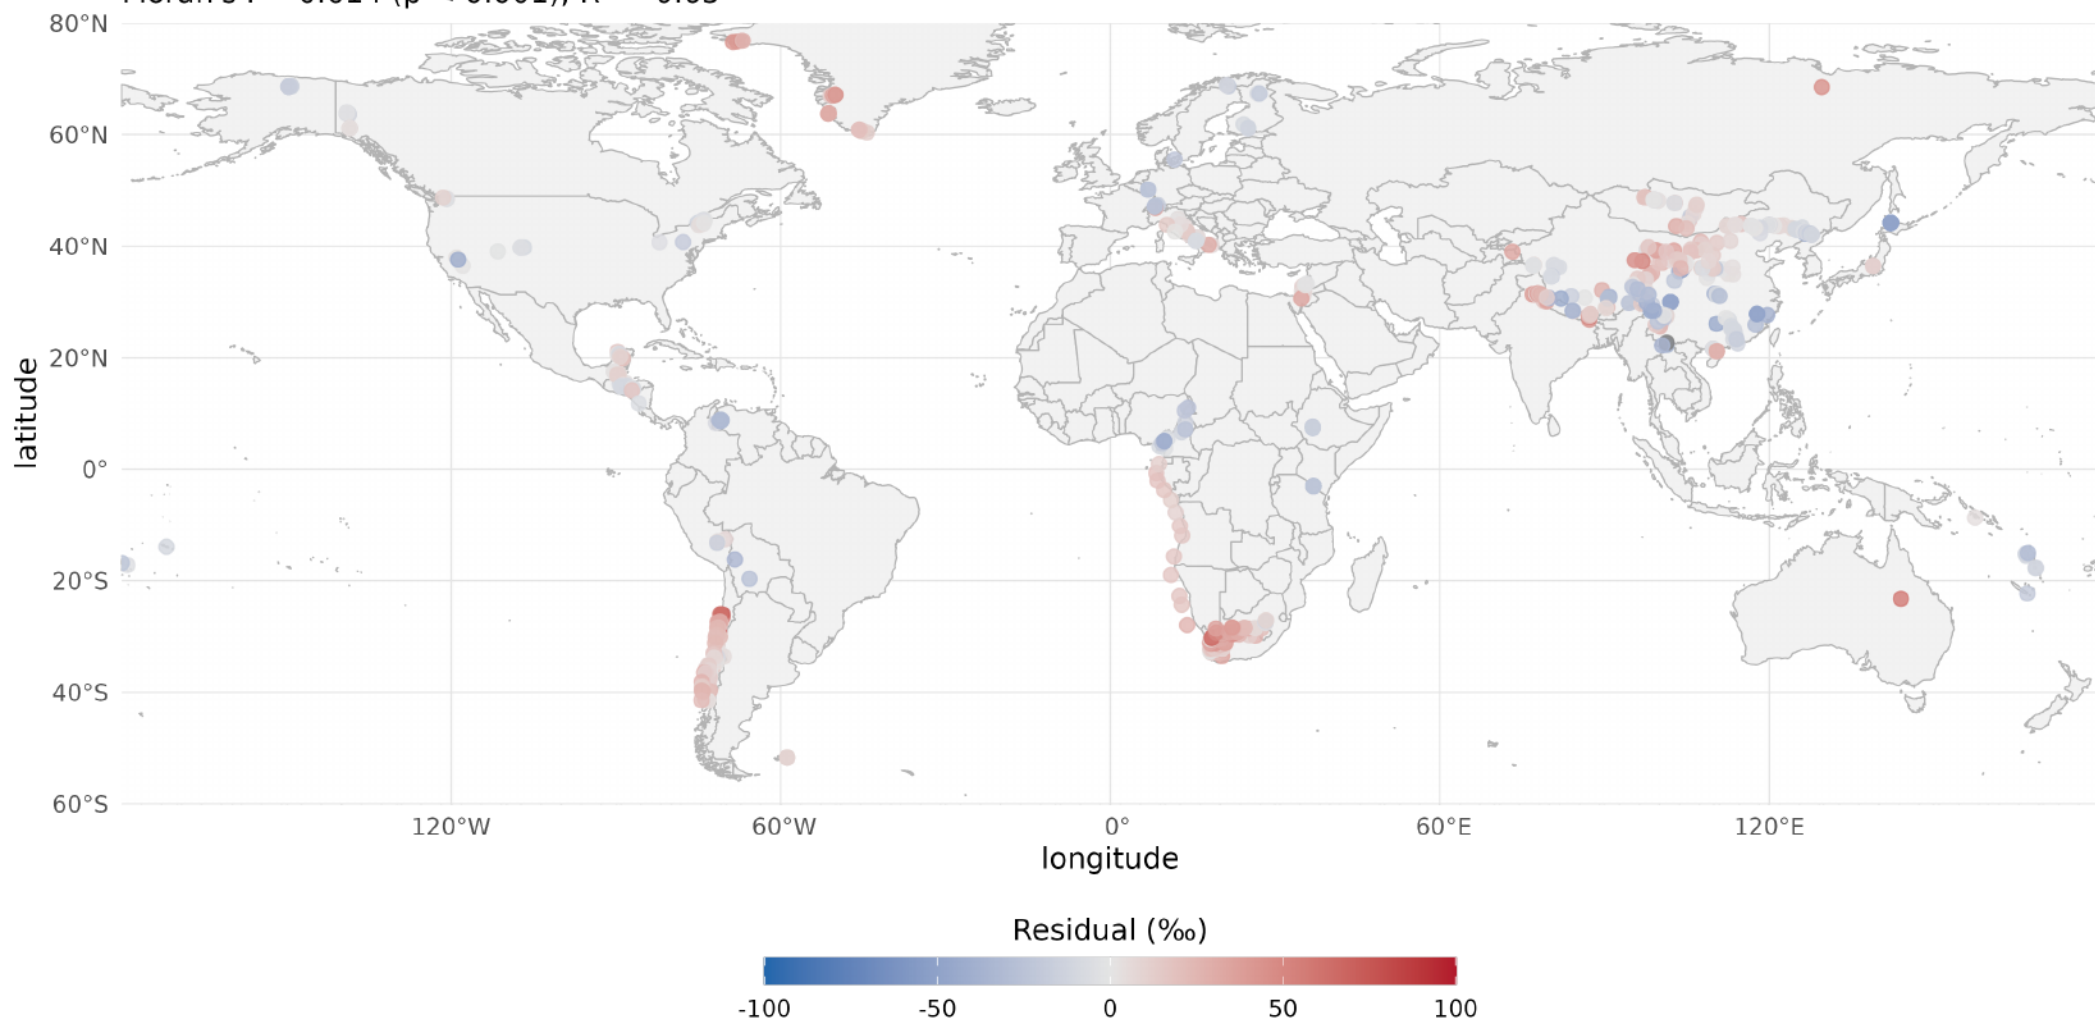

Correlations Before Variable Removal

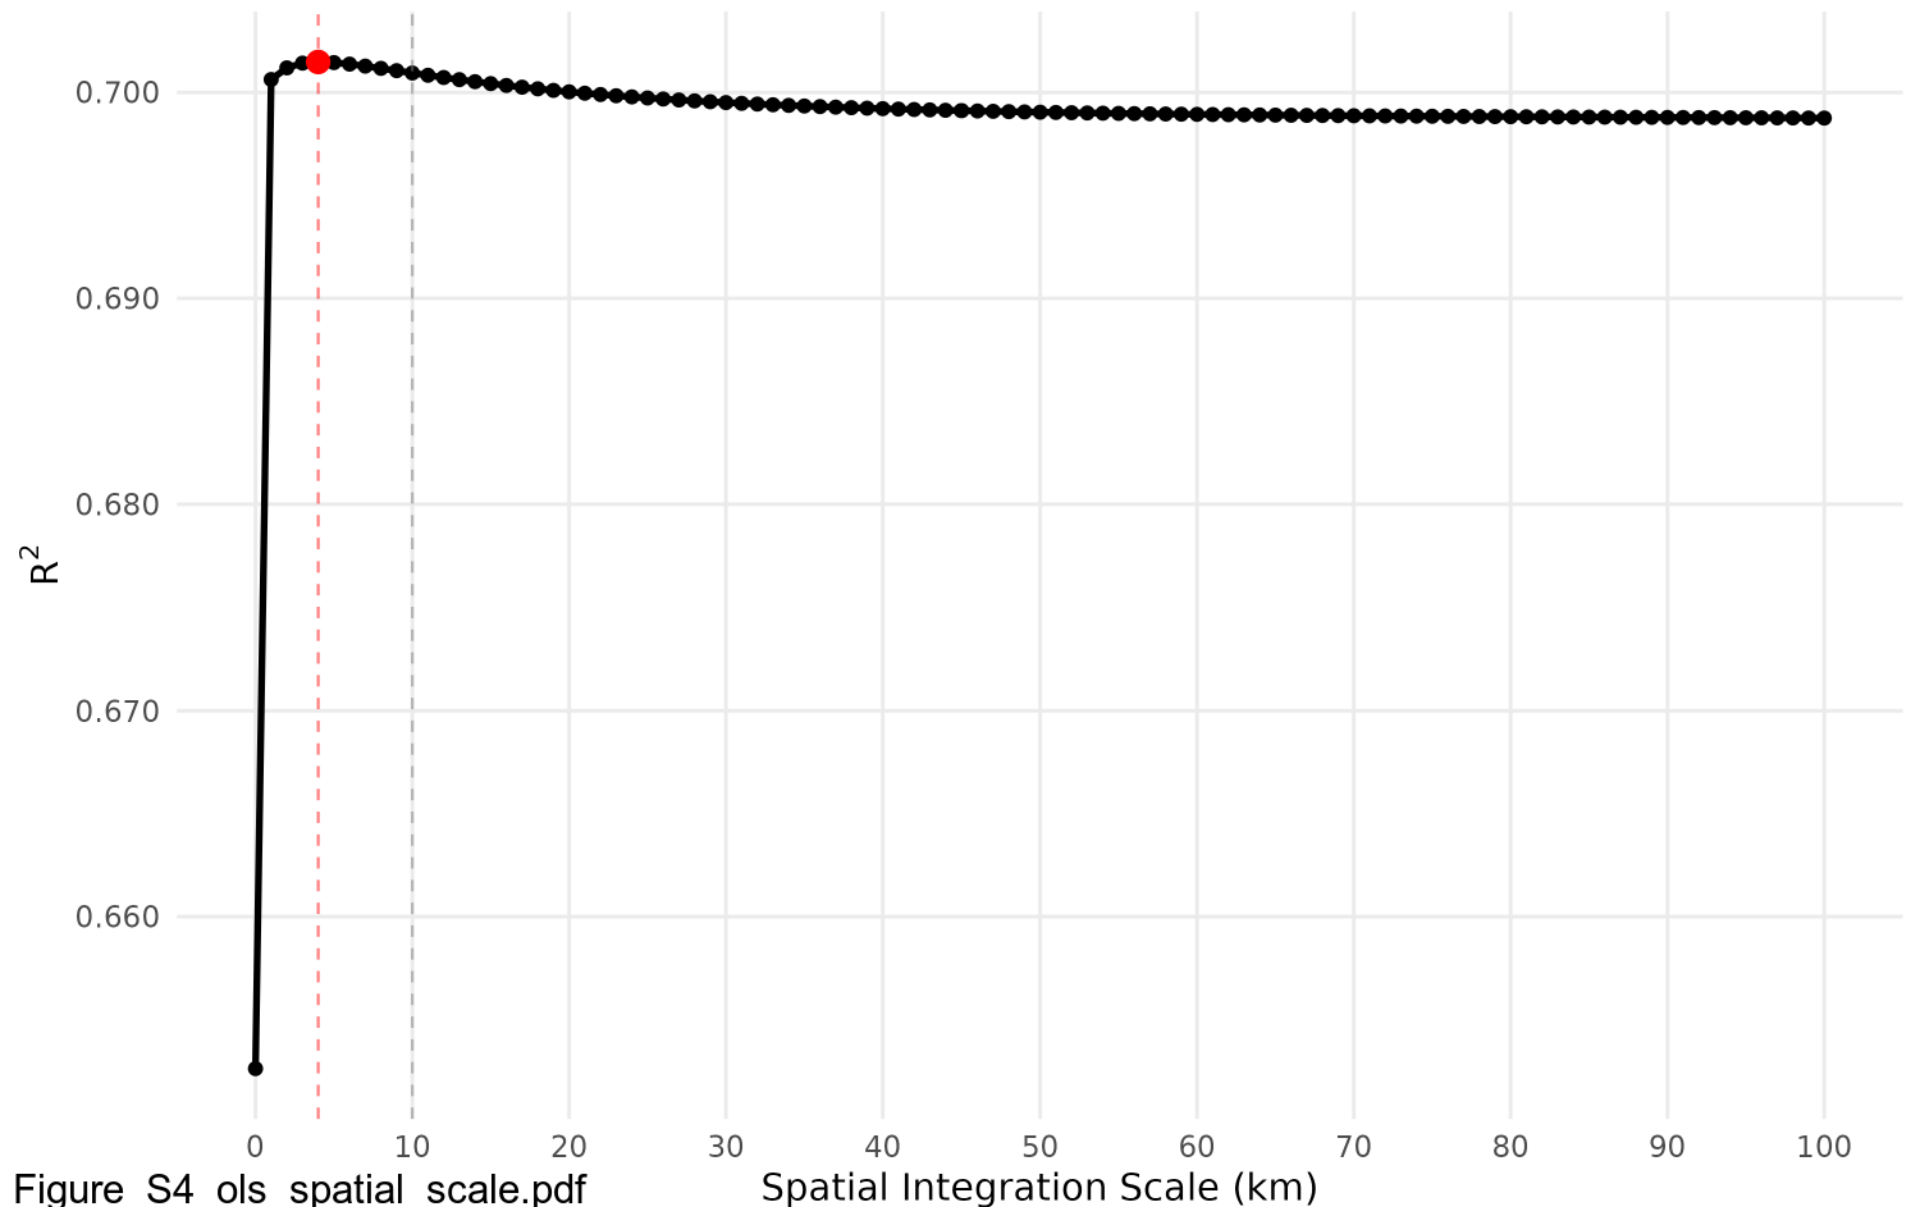

Spatial pattern of OLS residuals ($\delta^2\text{H}_{\text{wax}} \sim \delta^2\text{H}_{\text{precip}}$)

Moran's I = 0.614 ($p < 0.001$); $R^2 = 0.65$

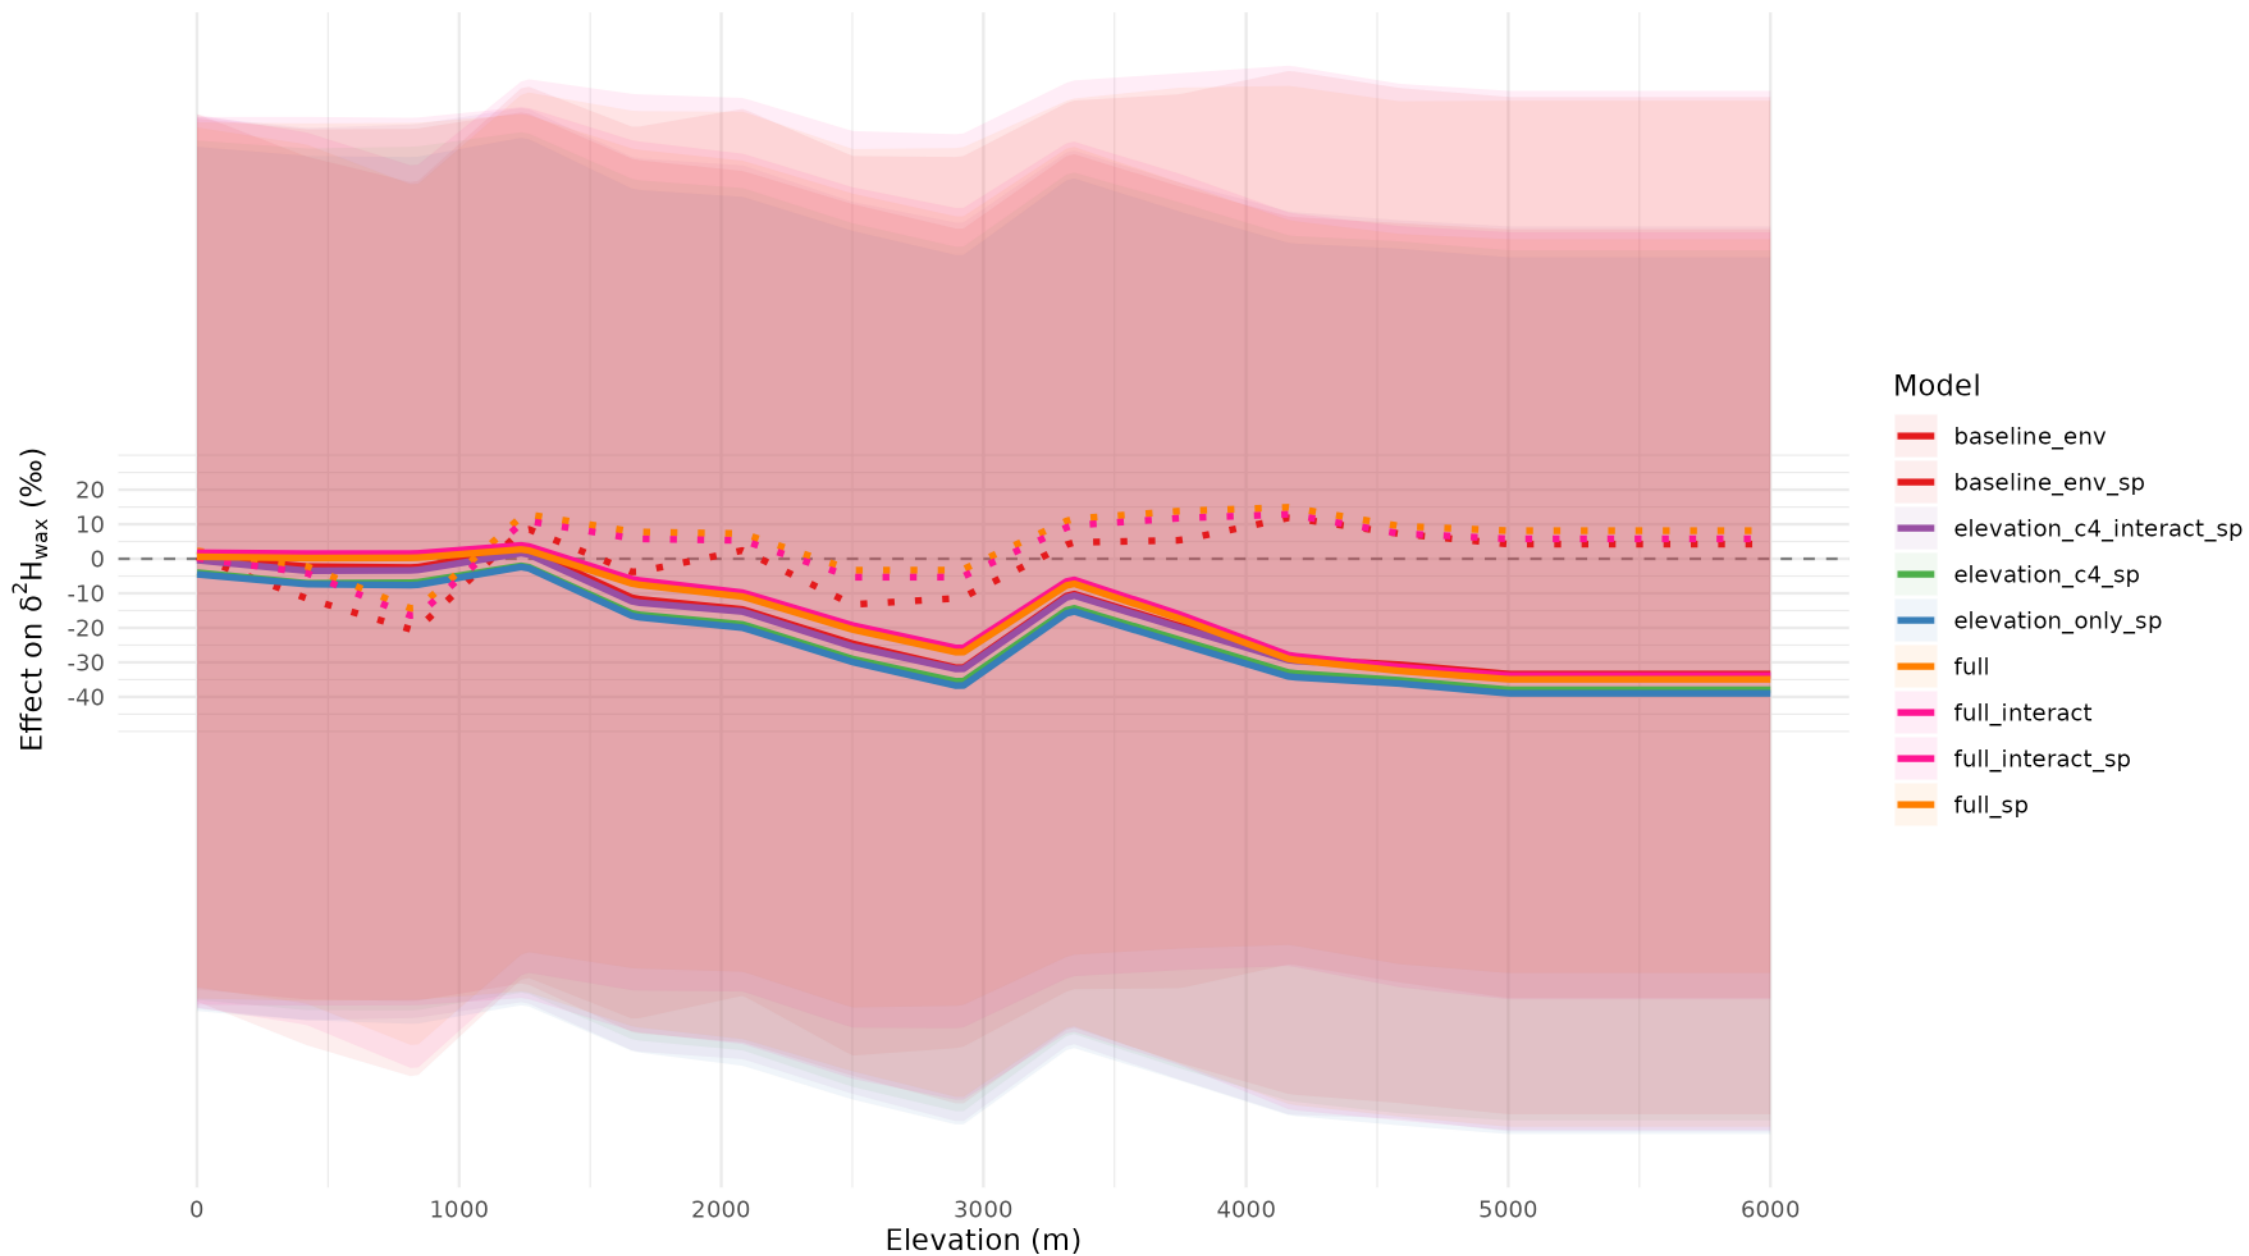

OLS Model Performance vs Spatial Integration Scale

Exponential weighting with varying effective scales

A. Elevation effects across models

90% credible intervals shown

B. Sample distribution across elevations
